

Scalpel Sharpness Tester

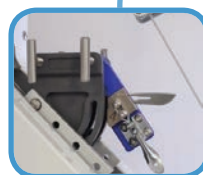

Anago's Scalpel Sharpness Tester (SST) delivers objective test results to prove the sharpness of scalpel blades

Product	Scalpel Sharpness Tester (SST)
Application	Scalpel blades
Customer	Scalpel manufacturers
Output	Onscreen and to PC

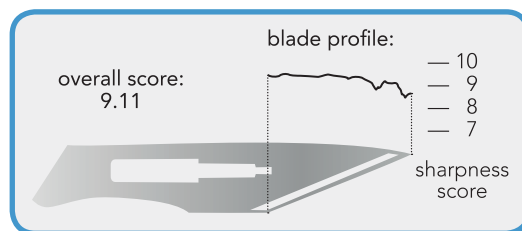

Tests different types of scalpel blades

The SST utilizes proven Anago technology to provide an immediate, accurate sharpness reading along the entire length of the scalpel blade

BENEFITS

- Reliable comparisons with your competitors' products
- Guaranteed sharpness levels for your customers
- Ongoing optimization of your blade design, manufacturing and sharpening
- Accurate and thorough comparison of sharpness variations across your blade types, treatments, coatings and sharpening systems

"Delivers a great deal more data, enabling process performance review based on the sharpness curves of the entire length, while still allowing for rapid spot-sharpness review measurement" SCALPEL MANUFACTURER, CHINA*
